

Safety Warnings – Wooden Candle Holders

This safety warning list has been prepared in accordance with the requirements of Regulation (EU) 2023/988 on General Product Safety (GPSR).

The purpose is to protect users from potential hazards resulting from improper use. The warnings are written in a simple and understandable way to ensure accessibility for a wide range of users, including older people and those with limited mobility.

Scope:

These warnings apply to candle holders made of wood, including models with or without a metal insert (e.g. brass).

Usage warnings:

- Never leave a burning candle unattended.
- Use the candle holder only on a stable, heat-resistant surface.
- The candle should fit snugly in the holder – never force a candle that is too large.
- Do not use the candle holder if it is damaged (e.g. cracked, scorched, or unstable).
- Keep away from flammable materials (e.g. curtains, paper, decorations).
- Keep out of reach of children and pets.
- Extinguish the candle when about 1–2 cm of wax remains – do not allow the flame to reach the wooden surface.
- If the product includes a metal insert (e.g. brass cup), do not remove it – it protects the wood from heat and helps prevent fire hazards.
- After use, allow the candle holder to cool completely before cleaning or moving it.
